

Zune Sound Bites: Omar Alexander

by Marques Lyons | 4/01/2009 in [free music downloads](#), [zune music reviews](#) |

This must just be my week for discovering some awesome artists. I came across Omar Alexander in my trek through some of the artists being represented by Ariel PR. What struck me about his album cover was that it took on this Latin Daughtry vibe – don't ask me why, that's what I saw. I think it's in his pose.

When I got to listening to some of his music, I couldn't help but groove. The one track I downloaded that totally stood out to me was a track called "Shine". It has a very tight groove and it's one of those songs you could find yourself singing out loud if it was played live in concert. I got the feeling that this is one of those tracks that you sing while standing on the roof of your house :-). Unfortunately, his stuff isn't available at ZMP (much like [Lisa Bianco](#) -- what's up with that!?)
